Global Spine Journal (GSJ) is a peer-reviewed, Open Access journal, devoted to the study and treatment of spinal disorders, including diagnosis, operative and non-operative treatment options, surgical techniques, and emerging research and clinical developments.

With a multi-disciplinary scope, **GSJ** features original research, reviews, commentaries, editorials, and technical reports in all spine fields. The journal promotes communication among spine surgeons, orthopaedic surgeons, and neurosurgeons across the globe by providing an integrated and balanced view of the clinical and basic science studies of spinal disorders.

Why Publish Open Access in GSJ?

- **GSJ** targets an international audience and has authors, reviewers, and deputy editors from different countries all around the world.
- **GSJ** is indexed in PubMed Central, Scopus, and Emerging Sources Citation Index (ESCI).
- **GSJ** targets both Orthopaedic and Neurosurgeons that specialize in spine.
- **GSJ** is one of the only Open Access journals that still circulates a print version.
- **GSJ** waives the Article Processing Fee (APC) for all manuscripts where at least one author is an AOSpine member.

Not an AOSpine member?
